## SUMMARY

I am a highly skilled full-stack developer with a strong background in JS/TypeScript and a passion for creating clean, maintainable code. My goal is to contribute to the success of your team by using my skills and experience to drive technological innovations and discussions and to champion a continuous improvement mindset. I am committed to producing high-quality work and to collaborating with others to achieve common goals. I believe that my ability to work well with teams makes me a valuable asset to your organization.

## SKILLS

### Technical Skills

- Proficient in full-stack development using Node.js, PostgreSQL/MySQL and Nuxt/Vue.js.
- An understanding of software development principles and best practices.
- Experience with debugging code.

### Language Skills

- English - native speaker.
- Twi - moderate speaker

### Other Skills

- Strong communication and collaboration skills
- Ability to work well in a team environment
- Proactive problem-solver with a continuous improvement mindset
- Experienced in mentoring and knowledge sharing with less experienced colleagues

---

### **Casantey Business Solutions, Adjiringanor - Web Applications Developer**

AUGUST 2018 - MARCH 2022

- Contributed in the development of MyAssembly.gov. An upgraded version of CSSRMS. My role involved me developing the administration interfaces on the web using Nuxtjs.
- Developed a web application called CSSRMS. A system that helped local assemblies to collect tolls from citizens within their jurisdiction. The system was used by Tema West Municipal Assembly (TWMA) for Property Rate collections, Okaikwei North Municipal Assembly (ONMA) for the collection of Property Rates and Business Operating Permits collections and Adentan Municipal Assembly (ADMA) for Property Rate collections. My role involved the creation of the web interfaces for citizens and the local assemblies. It was developed using MySQL as the database, Node.js as the backend and Angular as the frontend.
- Developed a web application called VaccineUpp. A system to help citizens book appointments for their vaccine shots during the covid pandemic. My role involved the creation of the web interfaces for governing institutions that had been onboarded to manage schedules and. It was developed using MySQL as the database, Node.js as the backend and Angular as the frontend.
- Developed a web application called BODA Community. A system to help members of a given area to report crimes and social vices to relevant authorities in the neighborhood. The system was later updated to include the reporting of suspected covid cases and involve contact tracing. My role involved the creation of the web interfaces for governing institutions that had been onboarded to manage reported

---

cases. It was developed using MySQL as the database, Node.js as the backend and Angular as the frontend.

- Managed databases for other ongoing projects
